

2480193 - MOVEMENT_AUTO flag is not passed from SRM Shopping Cart to ECC Reservation

Version	1	Type	SAP Knowledge Base Article
Language	English	Master Language	English
Release Status	Released to Customer	Category	Problem
Component	SRM-EBP-SHP (Shopping Cart)	Released On	26.05.2017

Please find the original document at <https://launchpad.support.sap.com/#/notes/2480193>

Symptom

In Classic Scenario, Shopping Cart is created in SRM, which generates a Reservation in ECC. MOVEMENT_AUTO flag is not transferred to BAPI_RESERVATION_CREATE1 (RESB-XWAOK).

Environment

- SAP Supplier Relationship Management (SRM)
- SAP enhancement package for SAP Supplier Relationship Management

Reproducing the Issue

1. Create, order and approve a Shopping Cart in SRM;
2. Follow-on Reservation is created in ECC;
3. Field RESB-XWAOK is not checked.

Cause

This is the standard behavior.

Resolution

In SRM standard, field MOVEMENT_AUTO (Goods movement for reservation allowed) is not available in Shopping Cart. Therefore, it is not transferred to BAPI_RESERVATION_CREATE1.

If this functionality is required, Business Add-In BBP_CREATE_BE_RS_NEW should be used.

Within method FILL_RS_INTERFACE1 it is possible to manipulate flag MOVEMENT_AUTO at item level (structure BBPT_BADI_RS_ITEM_CREATE1).

Keywords

Goods movement for reservation allowed, MOVEMENT_AUTO, RESB-XWAOK, BAPI_RESERVATION_CREATE1, BUS2121, BBP_CREATE_BE_RS_NEW, FILL_RS_INTERFACE1, Shopping Cart, Reservation, SRM, ECC, ERP, SRM_SERVER, flag, default, BAdI, Business Add-In

Products

SAP Supplier Relationship Management all versions
